

[www.VisitUtah.com](http://www.VisitUtah.com)

The VisitUtah.com team has assembled a list of information pages, articles and itineraries from our consumer-facing site that feature Utah dark sky content. We encourage you to share these digital content resources through your channels to highlight April 2023 being declared Utah Dark Sky Month (the third Dark Sky Month in Utah’s history). View the guidelines for sharing located at the bottom of this document!

## Sharing Guidelines

On Your Website: We're happy to have you utilize our content, but for the sake of Google not flagging our articles as duplicate content when it is cataloged, we ask you to write a summary of the article on your blog (you're welcome to pull from some of the existing language), and then end with "Read the full article on [insert visitutah.com article URL]."

That way it captures values for your readers and points to the complete resource but isn't duplicative in Google's eyes in a way that penalizes our content.

In Your e-Newsletter: If you are sharing VisitUtah.com that has been added to your website (in line with the requirements above), then you are welcome to point directly to that article from your newsletter without referencing VisitUtah.com or Visit Utah. If it fits your design to attribute an article, you are welcome to credit "Visit Utah" in your email, but it is not required.

On Social Media: We encourage you to join us in amplifying Visit Utah content on your social media channels. You are always welcome to reshare content posted on our @VisitUtah channels. You are also welcome to share a direct link to content on VisitUtah.com, or to a page on your website that follows the requirements above.

In either case, we ask that you tag @VisitUtah and use the hashtag #DarkSkyMonth. If you are using a photo from Visit Utah, please always include the original photographer's credit.
